The regulations set forth in this Section govern the application of rates for services contained in Section 4 of the tariffs of the Company.

2.14.2 Rates Based on Duration of Use

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- (a) Unless otherwise specified, calls are timed in one minute increments. All calls which are fractions of a measurement increment are rounded-up to the next whole unit.
- (b) Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s).

SECTION 2 - RULES AND REGULATIONS (Cont'd)

2.14 Application of Rates (Cont'd)

2.14.2 Rates Based on Duration of Use (Cont'd)

- (c) Timing terminates on all calls when the calling party hangs up or the Company's network receives an on-hook signal from the terminating carrier.

2.14.3 Rates Based Upon Distance

Where charges for a service are specified based upon distance, the following rules apply:

- a. Distance between two points is measured as airline distance between the Rate Centers of the originating and terminating telephone lines. The Rate Center is a set of geographic coordinates, as referenced in National Exchange Carrier Association, Inc. Tariff FCC No. 4, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is no telephone number associated with an access line on the Company's network (such as a dedicated access line), the Company will apply the Rate Center of the Customer's main billing telephone number.
- b. The airline distance between any two Rate Centers is determined as follows:
 - 1) Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced NECA tariff.
 - 2) Compute the difference between the "V" coordinates of the two rate centers; and the difference between the two "H" coordinates.
 - 3) Square each difference obtained in step (2) above.
 - 4) Add the square of the "V" difference and the square of the difference obtained in step (3) above.
 - 5) Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.

- 2.15.2 No charges apply if a Call is not completed.
- 2.15.3 For billing purposes, all Calls are rounded up to the nearest minute and billed in increments of one minute. The minimum Call duration is one (1) minute for a connected Call.

Where answer supervision is not available, any Call for which the duration exceeds sixty (60) seconds shall be presumed to have been answered and becomes billed usage.
